Just checking in to see if you've had the opportunity to resolve this and provide a webinar link and conference line for us to include in the final meeting agenda/invite?

**Subject:** RE: Leviathan Mine || Webinar for the Annual Technical Updates Meeting

Lynda,

As you may recall, last year the Sherriff's office could not provide us access to their internet or a speaker phone. I'm assuming that still has not changed for security purposes, however, if U.S. EPA could double check with the facility that would be great.

If the facility cannot provide phone and internet access we should be able to set it up same as last year. This means that we will have to run audio from my cell phone and run the presentations shown via the webinar from our Sacramento office in parallel with that being shown in the meeting room. This will require that all presenters provide us with a copy of their presentations in final form the day before the meeting. Seems to me that there were some minor issues with a couple of animated presentations as they were provided to us in PDF and not as live PowerPoint files so presentations either need to not have animation or we need the actual PowerPoint file.

I will establish a Go-To-Meeting webinar number and conference line and forward you the information for inclusion in the meeting invite.

Thanks,

Marc

Lynda,

Last year we pulled together a last-minute request for a webinar. Actually, AR pulled it together by supporting a phone line, a webinar platform, and running the show. I know it was a big push at the last minute. I wanted to check-in to see if you have discussed a webinar with AR this time around.
